

ESMAT PLASTIC

Software Development Project — Payment & Delivery Statement

Esmat Plastic Desktop Management System — Version 1.0.0

Project: Warehouse & Inventory Management Desktop System

Developer		Customer	Esmat Plastic
Project Version	1.0.0	Date	22 September 2026
Delivery Type	Desktop Application Development	Deployment	Not included

1. Scope of Work Completed

#	Work Package	Description	Cost (EGP)
1	Desktop Application UI	WPF desktop interface, layouts, Arabic/English text rendering, responsive sizing and usability improvements.	8,000
2	Backend / Web API	ASP.NET Core Web API, RESTful business operations and application service layer.	7,000
3	Database & Data Access	Entity Framework Core integration, local SQL Server database structure and PostgreSQL/Neon cloud connectivity.	5,500
4	Inventory & Warehouse	Products/variants, stock-in, stock-out, balances and movement/audit history.	6,000
5	Users & Permissions	User management, roles and policy/claims-based authorization.	3,500
6	Reports & Export	Dashboard/statistics, filtering, CSV/Excel export and printing functionality.	3,000
7	Localization & Settings	Arabic/English localization service, language switching, server address and connection settings.	2,000
8	Testing & Code Cleanup	Build verification, removal of unused/temporary code, UI polishing and final technical cleanup.	5,000

Total Project Development Fee

**EGP
40,000**

2. Included in the Development Fee

- Completed desktop management application as described above.
- Application source code and project files created for the agreed system scope.

- Database integration configured for the selected development setup.
- Use of the Neon PostgreSQL free tier as the database service for the current configuration.
- Final build verification and cleanup corresponding to Version 1.0.0.

3. Explicitly Excluded

- Deployment to production servers or installation/configuration at the customer's premises.
- Paid hosting, paid database plans, domain fees, VPS/server fees or third-party subscription charges.
- Ongoing maintenance, technical support, monitoring or future feature development.
- Future changes required because of third-party service pricing, free-tier limits, API changes or service discontinuation.

4. Payment Request / Acknowledgment

The amount requested for the completed software development work described in this document is EGP 40,000 (Forty Thousand Egyptian Pounds).

This document is intended as a project payment statement and delivery record. It does not constitute a separate maintenance or hosting agreement unless additional services are agreed in writing.
